

NSF/ANSI STANDARD 50

Safety Durability and Toxicity

NSF is Known for helping people Swim Safer

ECOSUN is proud to be the only US manufacturer to have earned NSF 50 certification.

NSF 50 CERTIFICATION provides **ECOSUN** customers with the peace of mind that our product meets the highest testing standards for **Safety Durability and Toxicity**. **ECOSUN** customers can be assured that the only thing that is produced by **ECOSUN** Solar Water Heating Panels is Warm, Safe Solar Heated Water.

NSF certification is your key to making sure that the products you use meet strict standards for public health protection and are tested to the highest level of product acceptance and compliance within the industry.

NSF 50 is an International standard that is recognized by legislators and regulators to ensure products used in public recreational water facilities increase safety and enjoyment for pool water users. In fact, most commercial water facilities will only consider products from NSF 50 Certified suppliers.

Choosing a product certified by NSF lets you know the manufacturer complies with strict standards and procedures imposed by NSF. From extensive product **DURABILITY & TOXISITY** testing and material analyses to unannounced plant inspections, every aspect of a product's development is thoroughly evaluated before it can earn an NSF certification.
